

ATLANTIS

Soil Surfactant

GUARANTEED ANALYSIS

Esterified Glucoether Surfactants.....45.00%
Total Inert Ingredients (water).....55.00%

Net Volume: 245 Gallons Tote (947 liters) - Weight 9.0 lbs/gallon.

CAUTION: KEEP OUT OF REACH OF CHILDREN. May be harmful if swallowed.

PRECAUTIONARY STATEMENTS

Read the entire label before using this product. May cause irritation to skin and eyes. Ingestion of large amounts may cause irritation, dizziness, nausea and possible vomiting.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators or handlers of this product must wear: long-sleeved shirt, pants, shoes and socks, chemical resistant gloves and splash-proof goggles. Consult the MSDS for further information.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Give large amounts of water to drink. Do not induce vomiting. Seek medical attention immediately.

If Inhaled: Ventilate the premises.

If In Eyes: Immediately flush with water keeping eyelids raised. Seek medical attention.

If On Skin: Wash with soap and water.

GENERAL INFORMATION

ATLANTIS is a proprietary soil surfactant formulation that reduces the surface tension of water to allow increased infiltration and penetration into mineral soils and soilless plant growth media. ATLANTIS optimizes irrigation efficiency and improves delivery of water to the root zone, resulting in optimized growing conditions. ATLANTIS IS FORMULATED FOR USE ON AGRICULTURAL AND ORNAMENTAL CROPS, GOLF COURSES, ATHLETIC FIELDS, AND RESIDENTIAL OR COMMERCIAL LAWNS UNDER THE SUPERVISION OF TRAINED GROWERS AND APPLICATORS. ATLANTIS can be applied as an injection in irrigation systems or through conventional spray equipment.

DIRECTIONS FOR USE

ATLANTIS can be safely applied throughout the growing season to prevent or treat soil conditions that limit water infiltration and increase plant stress. ATLANTIS is compatible with most fertilizers and pesticides. It is always recommended to conduct a jar test prior to full field application.

APPLICATION GUIDELINES & INSTRUCTIONS – (ALWAYS SHAKE OR STIR WELL PRIOR TO USE)

INJECTION: Apply 1 to 4 quarts/acre (2 to 10 liters/hectare), apply in the first half of the irrigation set after the lines have been charged to allow lines to flush and move product into the soil. Apply every 30 days or as needed.

SPRAY APPLICATION: Apply 1 to 4 quarts/acre (2 to 10 liters/hectare), apply with sufficient water to assist product movement into the soil profile. If no rainfall occurs within 3 days of application, irrigate to move product into soil. Apply every 30 days or as needed.

STORAGE AND DISPOSAL

Do not store in direct sunlight. Protect product from freezing. If product freezes warm to room temperature before use. Store in original container only, do not transfer into food or drink containers. Triple rinse container thoroughly, disposing of contents and container in accordance with federal, state and local regulations.
